

The Lyric™ Thermostat

Honeywell

**Comfort. Savings. Life.**  
**Perfectly in tune.**

# Introducing Lyric

## SMART, SLEEK AND SIMPLE

Busy families don't operate on a fixed schedule. Why should their thermostats? The Lyric thermostat is designed for how people really live. No schedules, no programming, and no complex menus — simply comfort when you're home and savings when you're away.

# Geofencing

Lyric adjusts to life as it happens, using your smartphone location to make it comfortable when you're home and save energy when you're away.

No guessing. No learning curve.

You can also manually override your current setting when you'll be out for a few hours by tapping the away button on the thermostat or in the app.

On a **hot, humid day** the Lyric thermostat may cycle the A/C more often to ensure your home feels like a real 72°.

## Fine Tune

To make sure you are always comfortable, the Lyric thermostat considers indoor and outdoor temperature and humidity levels to make subtle adjustments, so 72° really feels like 72°.

On a **hot day with lower humidity** levels, the Lyric thermostat may not need to run the A/C as much.

Visit [lyric.honeywell.com/support](https://lyric.honeywell.com/support) for user guides and answers to common questions.

# App-based setup

## CONTRACTOR

Your contractor will complete the **“Install”** and **“Configure”** steps to make sure your heating and cooling system is properly set up and configured.

## HOMEOWNER

After your contractor configures your system, use the Lyric app on your smartphone to complete the **“Connect”** and **“Personalize”** steps.

# Additional features

## SHORTCUTS

The Lyric thermostat makes it simple by replacing menu-driven controls with handy one-touch shortcuts. You can create unique shortcuts for situations like working out, having people for dinner, sleeping in, or anything that fits your dynamic lifestyle.

## WEATHER AT-A-GLANCE

See current conditions and a 6- or 12-hour forecast on-screen or on the app.

## SMART CUES

Sends you maintenance notifications and extreme conditions alerts to help you manage your heating and cooling.

# Smart benefits

Lyric builds off the Honeywell legacy of comfort controls. Since 1953, Honeywell has been on the forefront of technology and design.

## NO LEARNING CURVE

With geofencing enabled, Lyric automatically starts saving after install.

## NO GUESSING

Geofencing is prompted by your smartphone location, not movement near a sensor in your home.

## OPTIMAL COMFORT

Fine Tune considers indoor and outdoor humidity, as well as temperature, to reach the desired set point, ensuring 72° really feels like 72°.

**Honeywell**  
**thermostats**  
**are the top choice**  
**for consumers.**

# Is the Lyric thermostat right for me?

## WHAT DOES A TYPICAL WEEK LOOK LIKE FOR YOUR FAMILY?

If it's always busy, Lyric automatically makes sure the home is comfortable when you're there and saves energy when you're gone. Lyric adapts to your schedule, no matter how often it changes.

## HOW OFTEN DO YOU USE APPS?

With Lyric, you can monitor and manage home comfort from a mobile app, providing peace of mind while you're at work or traveling.

## WOULD YOU LIKE YOUR THERMOSTAT TO REMIND YOU ABOUT ROUTINE MAINTENANCE AND REPORT ON MONTHLY ENERGY USAGE?

The Smart Cues feature will send alerts and notifications for things like filter replacement, seasonal maintenance and if your home's temperature is outside normal ranges.

## DOES YOUR THERMOSTAT HAVE TROUBLE KEEPING YOU COMFORTABLE ON UNUSUALLY HOT, COLD OR HUMID DAYS?

The Fine Tune feature accounts for temperature and humidity, inside and out, when telling the HVAC system how warm or cool to make your home, so 72° feels like 72° even on a hot, humid day.

Plus, if your home feels too dry, or you notice condensation on your windows, Lyric can connect to a humidifier/dehumidifier, and you can control it right from the app just like the thermostat.
